

BONAIRE

Kentucky Bluegrass

You Have to Have this Variety In Your Blends!

The whole purpose of blending is to broaden genetic diversity, not narrow it. Bonaire Kentucky Bluegrass is an excellent choice as a mono-stand and a blending variety. This new “Shamrock” type has moderate spring vigor, aggressive rhizomes, good turf performance, and is a great value to any turfgrass user.

➤ **Great for Sports Fields, High Traffic Areas & Sites Where Recuperative Abilities are Needed**

➤ **Tops in University Turf Trials for Disease Resistance**

➤ **Excellent Value Ideal for Sod Production and any Turfgrass User**

1 Readily Available

As a Shamrock Type, Bonaire is a real workhorse in any blend or mixture where strong rhizomes, sod strength and wear tolerance are needed, all the while providing excellent value.

2 Moderate Spring Vigor

According to university trials, Bonaire provides a medium green winter color and good leaf spot resistance to any turf where bluegrass is adapted.

3 Aggressive Rhizomes

The high seed yields of Bonaire make this a versatile component in any blend or mixture where quality meets affordability.
