

GLOBAL DOUBLE CUT RED CLOVER

Variety	GLOBAL
Kind	Red Clover
Seeding Rate	22 lbs/acre (straight seed)
Recommended Time for Seeding	March to August
Sowing Depth	1-2 cm

Description of the variety:

GLOBAL is a diploid variety for perennial forage production, which is very healthy and rich in protein. In mixtures with grasses, e.g. meadow fescue or Italian ryegrass, **GLOBAL** supplies a high-quality basic feed. **GLOBAL** is persistent and can therefore be used for two or three years.

Key properties at a glance:

- ❖ High-yielding and hardy
- ❖ Very healthy
- ❖ Persevering
- ❖ High protein content
- ❖ Coated seed
