

Microclover

Trifolium Repens

- ✔ **Naturally Green**
- ✔ **Low Maintenance**
- ✔ **Crowds out Weeds**
- ✔ **Nitrogen Enhancement**
- ✔ **Tolerates Close Mowing**

Growth Habit	Established Rate Days	Low Mow Tolerance 1/2"	Mowing Frequency	Traffic Tolerance
Stolons	Fair	Excellent	1xMonth	Excellent

Nitrogen Required	Shade Tolerance	Cold Tolerance
None	Very Good	Excellent

Drought Tolerance	Endophyte Enhanced	Salinity Tolerance
Excellent	No	Average

Microclover

Many years of natural selection have resulted in revolutionary microclovers with all the benefits of traditional clover packed into very tiny leaves.

Healthy & Lush

Microclover spoon feeds nitrogen to the grass, producing a healthy, dense and naturally green lawn that is easy to maintain.

Weed Free Turf

The vigorous and dense growth of clover and grass together crowds out existing weeds and prevents new weeds from establishing. The unique dense stolon structure allows it to tolerate exceptionally low mowing heights.

Green Lawn All Year Long

Microclover has been bred to stay green from spring to winter. The healthy growth of the accompanying grasses contributes to the overall attractive green colour which remains throughout the year.

Environmentally Friendly

Very little fertilizer and water are required for Microclover. It would be difficult to find a more environmentally friendly, cost effective, and low maintenance turf solution.
