

THE #1 CONDITIONER ON AMERICA'S MOST PLAYABLE FIELDS

For over 40 years, Turface® products have enabled fields to perform to their fullest, through wet springs and dry summers—on more fields across America than any other brand. Our superior Turface particles are the preferred choice from the professional level to youth leagues. Turface conditioners are:

- Chosen by most Major and Minor League groundskeepers.
- Relied on by thousands of high school and college coaches.
- Used by thousands of park and recreational facilities.
- Incorporated into more NFL and MLS fields than any other soil conditioner.

### INFIELD CONDITIONERS

No other brand of infield conditioner is used more than Turface® for managing moisture, improving drainage and keeping skinned surfaces safe and playable. The porous, calcined clay particles absorb more water and resist compaction better than competitive products. With its low bulk density, Turface covers more surface area than other infield conditioners, providing greater cost savings.

Choose the Turface product that's right for you:

**TURFACE® MVP®** Our number one selling infield conditioner is the hands-down favorite among coaches and groundskeepers. Its large particle size resists compaction and controls moisture better than any other product.

**TURFACE® PRO LEAGUE®** Smaller, more uniform particles and an option between Natural, Original Red and Heritage Red coloring make this conditioner the choice of most Major League groundskeepers.

**TURFACE® QUICK DRY®** The fine particle size makes it the perfect choice for eliminating puddles and standing water. There's a reason Quick Dry is called the game saver!

# TURFACE ATHLETICS™. PERFORMANCE IN EVERY BAG.

Groundskeepers, coaches and parents alike turn to Turface® for solutions to their sports field challenges. We have the top performing products and excellent educational resources to help you get the job done right on every part of your field:

**SKINNED INFIELDS** Incorporate Turface into your baseball or softball infield mix for superior moisture management and consistent play. Turface® MVP® improves drainage and reduces compaction, while Turface® Quick Dry® quickly eliminates puddles and standing water. For the ultimate fielding and sliding surface, use Turface® Pro League® for its consistent particle size, or try Pro League® Red which combines rich red color with proven infield conditioning.

**MOUND & PLATE** Turface packing clays—available in bagged material and blocks—repair holes around the mound and batter's box for superior footing and player safety. They offer superior wear resistance and unmatched performance in areas receiving the most wear on the field.

**SPORTS TURF** Incorporate Turface into your native sports turf for superior drainage, better root growth and faster recovery times. Turface MVP and Field & Fairway™ add air- and water-holding capacity to the root zone, improving footing and eliminating mud when fields get wet. Field & Fairway Emerald also disguises worn areas; giving the appearance of turf even where the turf is worn.

## PACKING CLAYS FOR MOUNDS AND BATTER'S BOXES

No two areas of the diamond receive more abuse and constant wear than the pitcher's mound and home plate. Make sure they are built and maintained properly with the best virgin packing clays in the industry.

**MOUNDMASTER® BLOCKS** These hydraulically packed blocks of clay create the perfect foundation around home plate in the batter's and catcher's boxes. They come out of the bag pliable and ready to work. Packaged in convenient 8-block baggies for immediate use or easy storage.

**TURFACE PROFESSIONAL MOUND CLAY®** The same virgin clay used in MoundMaster Blocks is offered in a finely shredded bagged clay that is great for easy shaping for construction or daily maintenance.

## TURF CONDITIONERS

Whether your field is built on native soil or sand, Turface Athletics™ offers turf conditioners that improve footing, enhance drainage and hold just the right amount of air, water and nutrients at the root zone where your grass needs it!

**Select the best turf conditioner for your field:**

**FIELD & FAIRWAY™** This medium sized particle is ideal for incorporation, topdressing, infilling aeration holes, or dumping and raking on problem areas. It is also a quick fix to eliminate muddy, slippery areas that often form between the hashes or in goal mouths. It's available in natural and emerald green color to effectively disguise worn areas in sports turf.

**GREENS GRADE™** The smaller particle size of Greens Grade is ideal for sand-based root zones. Available in natural and emerald green colors, this conditioner works to improve footing, disguise worn areas, absorb moisture and improve the overall health of your turf.

**TURFACE® MVP®** The large particle size of Turface MVP makes it an excellent conditioner for native soil sports turf. MVP can be used in construction, renovation and topdressing applications, in addition to its common use on infields.
